January 31, 2018

Dear Mr. Dykes:

I am enclosing a Resolution that the Idaho City Council recently considered and adopted. The Resolution expresses Idaho City's support for the exploration and development of the CuMo Project in Boise County.

Idaho City recognizes the regulatory challenges that accompany modern mineral development. We encourage you and your employees to press forward with mineral exploration plans. We appreciate the efforts CuMo Mining Corporation has taken to engage community members during this process, and your company's commitment to undertake exploration activities in an environmentally responsible fashion.

It is our hope that exploration activities prove successful, and that the citizens of Idaho City and Boise County can once again be actively engaged in supplying an important domestic source of mineral wealth in the United States, as our predecessors first did over a hundred and fifty years ago.

Sincerely,

Phillip J. Canody, Mayor
